### Features:

- Seals to engine with captured FKM O-ring.
- Adjustable output to optimize hose plumbing path.
- Available in single and dual output configurations:
  - Single output adapters offer ultra-low profile plumbing options
  - Dual output adapters eliminate the need for plumbing Tee fittings.
- Upsizes from small OE hard tube to -3 or -4 AN.
- Can be used for front only venting or front/rear applications (two pair of adapters are required for four vent systems).
