

Caring for your Everbright manifold

Here are a few simple steps to keep your Everbright manifold looking great for years:

- Use a soft terry cloth towel to wipe any dust.
- Use a soft terry cloth towel with a mild solvent, such as brake cleaner, to clean grease.
- Spilled gasoline should be soaked up with a paper towel and then wiped with a clean terry cloth towel.
- Do not use any kind of metal polish.
- Do not use any cleaner that contain abrasives.
