

199R-9903

Pro-Jection Service Parts

This package contains all necessary items to connect the enclosed service part to your **Pro-Jection** system. Due to various engineering changes and refinements over the years, there may be extra items or you may need to alter the fuel pump cable connector. If your pump cable must be altered, snip off the plastic connector, select the appropriate terminals from the package, and crimp them onto the pump cable wires. Remember, the RED wire is positive (+) and the green wire is negative (-).
