Driver installation in Windows 8:
Download and install the latest version of the MSDView software off of the website http://www.msdignition.com/page.aspx?id=6545 and install it.

Click on Desktop (Yellow Arrow)

This is the Desktop Screen, Locate the Settings screen by clicking on the uppermost right hand corner.

Click on the settings button. (Yellow Arrow)
Once you click on Settings, Click on Change PC Settings (yellow arrow) In the desktop view (not metro view) click on settings (on the sidebar) then change PC settings.

Then click on General and Advance Start Up, and Restart now.
After the computer reboots, the screen will prompt “Choose an option.” Choose troubleshoot. (Fig 3c)

![Choose an option](image)

Fig 3c

Then choose Advanced options. (Fig 4c)

Fig 4c

Click on Startup Settings. (Fig 5c)

![Startup Settings](image)

Fig 5c

In the Startup Settings screen click on restart. (Fig 6c)

![Restart](image)

Fig 6c
When the screen prompts Startup settings, press the number 7 key, “Disable driver signature enforcement.”

In the Desktop view (not in Metro View), click on settings on the side bar, then control panel.

Next click on System and Security.

Under Systems, find Device Manager and Click on Device Manager

Once you click on Device Manager, this will pop up
Plug the Grid into the computer using the Micro USB to USB cable. MSD Virtual Com Port should pop up under the heading “Other Devices.” (Fig 11c)

Double click on MSD Virtual Com Port. Click on Update Driver. (Fig 12c)

Click Search automatically for updated driver software. (Fig 13c)

Windows security will prompt that the driver is not digitally signed by Microsoft. Click on Install this driver software anyway. (Fig 14c)
Click on close. (Fig 15c)

Open MSD View and verify that the Grid is connected. (Fig 16c)
